Profusion Red Yellow Bicolor Zinnia

Zinnia 'Profusion Red Yellow Bicolor'

Height: 16 inches

Spread: 18 inches

Spacing: 14 inches

Sunlight:

Hardiness Zone: (annual)

Group/Class: Profusion Series

Description:

This beautiful compact selection will add flare to gardens and patio containers with its cherry red and sunny yellow blooms; drought and heat tolerant; attracts pollinators; great for cut flowers

Ornamental Features

Profusion Red Yellow Bicolor Zinnia features bold yellow daisy flowers with red overtones at the ends of the stems from mid spring to late summer. The flowers are excellent for cutting. Its pointy leaves remain green in color throughout the season.

Landscape Attributes

Profusion Red Yellow Bicolor Zinnia is an herbaceous annual with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting butterflies and hummingbirds to your yard. It has no significant negative characteristics.

Profusion Red Yellow Bicolor Zinnia is recommended for the following landscape applications;

Planting & Growing

Profusion Red Yellow Bicolor Zinnia will grow to be about 14 inches tall at maturity, with a spread of 18 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 14 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. This fast-growing annual will normally live for one full growing season, needing replacement the following year.

This plant should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.

Profusion Red Yellow Bicolor Zinnia is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
