Beautifall™ N'Joy Pothos

Epipremnum aureum 'N'Joy'

Height: 9 feet

Spread: 24 inches

Sunlight: ○ ◐ ●

Hardiness Zone: 10a

Group/Class: Leafjoy Houseplants

Description:

A climbing or trailing vine with beautiful, shiny heart shaped leaves that are variegated in green and cream with pale yellow overtones; excellent for use in hanging baskets, on a climbing structure or moss pole; very adaptable and easy to grow

Features & Attributes

Beautifall N'Joy Pothos' attractive heart-shaped leaves remain forest green in color with showy creamy white variegation and tinges of buttery yellow throughout the year on a plant with a spreading habit of growth.

This is an herbaceous evergreen houseplant with a spreading, ground-hugging habit of growth. This plant can be pruned at any time to keep it looking its best.

Planting & Growing

When grown indoors, Beautifall N'Joy Pothos can be expected to grow to be about 9 feet tall at maturity, with a spread of 24 inches. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years. This houseplant performs well in both bright or indirect sunlight and strong artificial light, and can therefore be situated in almost any well-lit room or location. It does best in average to evenly moist soil, but will not tolerate standing water. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It will benefit from a regular feeding with a general-purpose fertilizer with every second or third watering. It is not particular as to soil type or pH; an average potting soil should work just fine. Be warned that parts of this plant are known to be toxic to humans and animals, so special care should be exercised if growing it around children and pets.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.
